

VAPOR RECOVERY UNIT - VRX15

VRX15 INFORMATION:

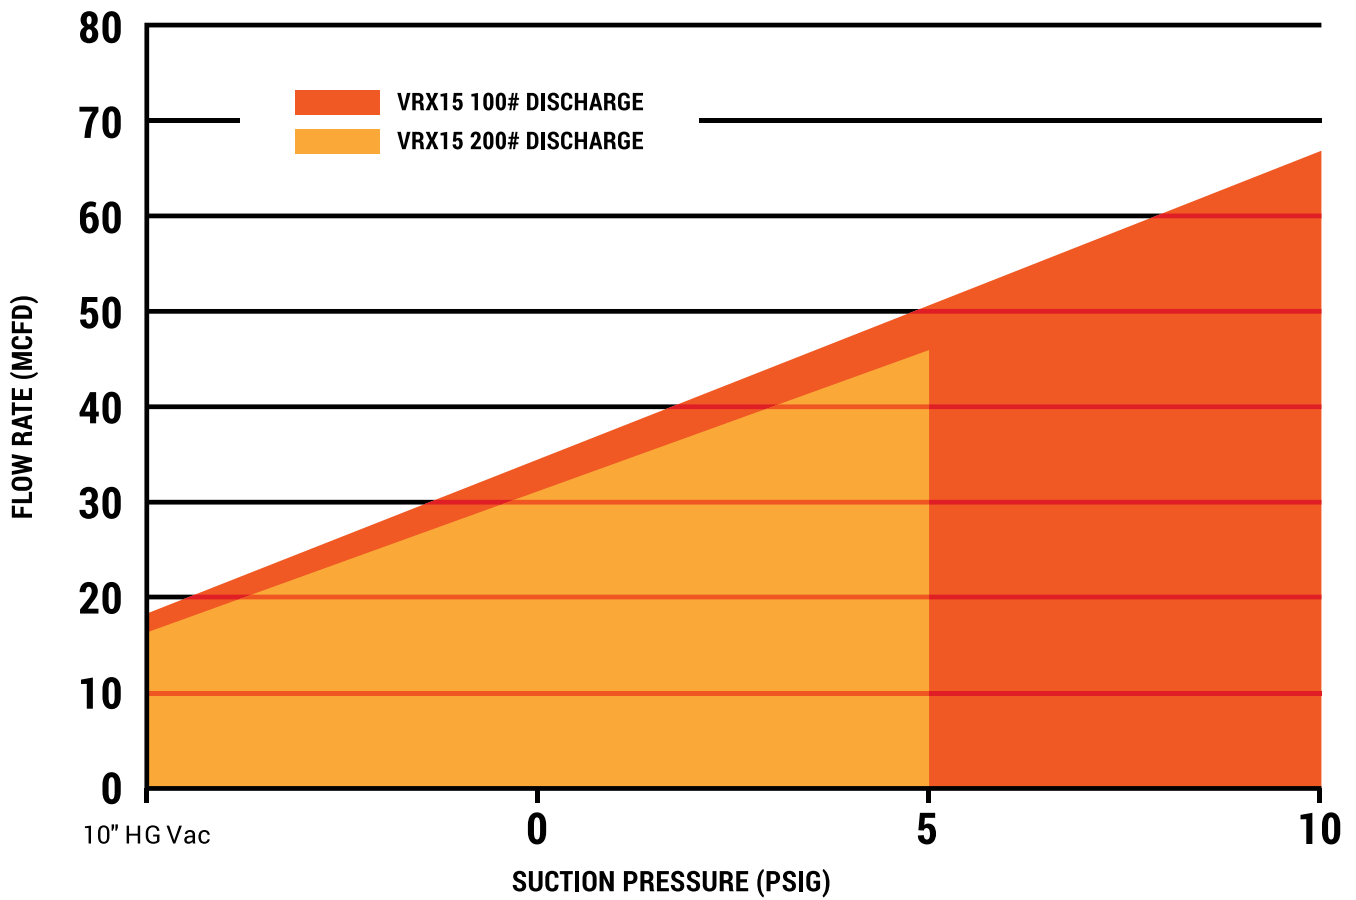

- 15 HP Electric
- Designed for exceptional performance in dedicated Vapor Recovery applications
- Sized for maximum revenue impact in low gas volume applications of 45 mcf/d or less
- Class I Division 2 Logix PLC with Variable Frequency Drive for precision tank pressure regulation
- ASME Sec VIII code pressure vessels
- Highly flexible rotary screw compressor with 100% turndown by speed control and recycle
- Automated start / stop functionality
- Suction Scrubber with integral blowcase to automatically eject separated liquids
- Optional Flux Telemetry system for detailed SCADA oversight and notifications
